

## Service

# EVault Protect<sup>SM</sup>

## QUICKSHIP

### Recovered Data Delivered To Your Doorstep

EVault Protect QuickShip is a premium business continuity service for subscribers who suffer catastrophic data loss and require rapid recovery of large data blocks from one or several production servers.

Your data is a precious asset. Protecting it is a business imperative. Resilient businesses must react quickly when a disaster renders production servers inoperable.

Companies licensing EVault InfoStage<sup>TM</sup> software or using EVault Protect online data protection and recovery services now have a competitive advantage with EVault Protect QuickShip. When disaster strikes, recovering data from damaged servers is just a phone call away. Once EVault is notified, the QuickShip device is delivered to your site of choice and quickly configured to restore data availability.

### Scenarios and Key Benefits

**Complete Disaster Recovery** - Should a firm or its data center succumb to a natural or man-made disaster, EVault sends the QuickShip subscriber a mobile data vault with the requested information, enabling you to rapidly restore lost data volumes.

time to retrieve, coordinate and mount backup tapes, the EVault Protect QuickShip service means data from multiple servers is sent to you on one device. No more tape management under duress.

**Eliminate The Server Failure Time Crunch** - Like an organization's data, situations change constantly. For a company that loses server access, but can't afford the

**Always Encrypted Data** - Data remains encrypted throughout the QuickShip processes. Decryption only occurs when a customer encryption key holder enters the passcode upon data restoration.
